The logic is that I want to search for that id in an array of IDs. If the ID is found I want the href attribute of the LI element to be deleted. Else, no element to be deleted. The input is connected to an array that has a bunch of IDs of categories. I have a search bar that does the filtering, but I don't know how to update the LI element that is linked to that particular ID that is being searched. Search

Watch Real Steel 2 (2011) Full Movie in HD Quality online for free. The greatest Olympic discipline is back. Get the energy, the heart, the spirit of the real .
